***Examiner's Amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David C. Ripma on 11/18/05.

**In the claims**

Claims 1 and 23 have been amended as follows:

1. In a Home Network telephone system, a method for controlling communications privacy, the method comprising:
  - transceiving calls on at least one external telephone line, where each external telephone line is associated with a unique telephone number;
  - supplying privacy and public mode bridging options;
  - independently selecting private and public modes for each external telephone line;
  - in response to the selecting the public mode for a first external telephone line, permitting bridges through a gateway, between the first external telephone line and any endpoint; and

in response to selecting the privacy mode for the first external telephone line, selectively excluding bridges through the gateway, between the first external telephone line and some but not all of the endpoints.

23. A Home Network telephone privacy management system comprising:  
a gateway having a port for transceiving calls on at least one external telephone line, where each external telephone line is associated with a unique telephone number, a port for receiving public and privacy mode selection commands, independently for each external telephone line, and a port for establishing bridges to the external telephone lines;

a plurality of Home Network endpoints, each endpoint having a user interface to accept mode commands and external telephone line selection commands, each endpoint having a port connected to the gateway for supplying mode and external telephone line selection commands, each endpoint having a port for establishing bridges to external telephone lines through the gateway;

wherein the gateway, in response to the selection of the public mode for a first external telephone line, permits bridges between the first external telephone line and any endpoint; and

wherein the gateway, in response to the selection of the privacy mode for the first external telephone line, selectively excludes bridges between the first external telephone line and some but not all of the endpoints.
